PROLOGUE, or INTRODUCTION

A MONG the Kingdoms and the Islands known,
 Throughout the far extended Earth, there's none
 Can with our little *Albion's* Isle compare,
 For plenteous Products, noble Feats of War.
 Not the dull rugged Nations of the North,
 With their tall Woods, and Mines of little worth;
 Nor can the *Western* World, of which we're told,
 That dwell in Wealth, and massy Mines of Gold.
 Nor the vast *Eastern* Empires where they boast
 Of their rich Toys transported to our coast:
 No! nor th' unhealthy *Africk's* golden Coast.
 Nor Slavish *France*, so fam'd for Wine and Punk,
 With which they make their Neighb'ring Nations drunk:
 Twixt Faith and Frolick, not to mention worse,
 Enslav'd themselves, and so they would do Us.
 Nor lofty *Spain*, who in her Glorious State,
 From *England's* Arms receiv'd her Ebb of Fate;
 And owes her Ruin to fam'd Eighty Eight.
 Nay! *Europe's* Garden, *Italy* is poor,
 Compar'd to *England's* Wealth and plenteous Store.
 Ah happy Isle! (and did I happy say?
 So I might still were the Lewd Crew away.)
 Blest in thy Situation; happy Seat,
 Not in the Frozen Zone, nor scorch'd with Heat;
 Thy fertile Vallies loads the Threshing Floor,
 Which makes the Rich increase, and feeds the Poor.
 Thy Fields fat Soil supports the Flock's Increase;
 Thy flow'ry Pastures yields the Golden Fleece.
 Here's all that Wise Men want; the rest may buy
 Their Toys from *France*, that Shop of Vanity.
 But blest (from Ruin; Heaven foresaw the Thing,)
 In a most Valiant and Puissant King;
 A King on whom all *Europe's* Councils wait,
 As well for his Advice as princely State.
 When to the Wars with his own Force he goes,
 To beat his Valiant, Fright his running Foes,
 He courts all Dangers and defies all thole.
 His Care secures our State, preserves the Crown:
 Both which the Plotting Tribe would fain pull down.

The Protestant Remembrancer continued.

ROME's black Militia that infernal Crew,
Like thirsty blood-Hounds, do our Lives pursue ;
Those Bloody Varlets, black Assassins,
Curs'd Executioners of *Rome's* Debates.
What Plots and Schemes these Apes have enter'd on,
Aim'd and design'd for our Destruction :
To kill the Kingdom's Heir; and to exclude,
From th' *English* Crown, the Stock of Royal Blood.
To Sacrifice our Lives, or make us own,
A Popish Bigot, or Tyrant for the Throne.

First, Parsons and Champian, two Jesuits, who had the Pope's Blessing to curse Queen Elizabeth, to absolve her Subjects from their Allegiance, and to depose the Queen, but their Plot was found out,

Parsons he out of *England* quickly fled,
And *Campion* he was hang'd all but the Head.

Second, William Parry, who upon Promise of the Pope for endless Joys in Heaven, undertook to kill Queen Elizabeth, notwithstanding the Wretch had been pardon'd of his Life by her once before.

But God the Queen miraculously preserv'd,
And *Parry* he was hang'd as he deserv'd.

Third, There was Ballard, Babington, Savage, Gage, Travers and Tilney, with some others, undertook to kill Queen Elizabeth, and bring all England under the Subjection of Rome, and for that Purpose had several Consultations in St. Giles's Fields, near London

These were the Consultations of their Brains,
And in those Fields was hang'd for their Pains.

Fourth, Doctor Lopez, a Portugal Jew, and the Queen's Physician, by a Golden Promise of Reward from the Pope, undertook to Poyson Queen Elizabeth, for which he was hang'd at Tyburn.

And so did miss of all his promis'd Riches,
And at his hanging did bewray his Breaches.

Pope Pius the 5th, sent a Bull to depose Queen Elizabeth.

Gregory the 13th, labour'd secretly to ruin her.

Sixtus the 5th, gave her Kingdom to the King of Spain.

To be continued.

Various is the Aspects and Positions of the Planets this Month But the most Predominant is the Conjunction of Saturn and Mars, which is a very Malevolent Position, and may produce in the World Effects of very ill Consequence to Mankind in General, for here is the Appearance of much Mischief, Troubles and dire Calamities impending.

The 20th Day of this Month 1706, was Born his most Serene Highness, *Fredrick Prince of Wales.*

I hope the Angry stars may dart down their Influence, remote from us, yet I fear we are not altogether free from the Malignity.

February hath XXVIII Days.

God's Works they are, and frustrate no one can,
His Will is just, although He punish Man.

Great Things the Heavenly Bodies do presage,
To be fulfilled in this latter Age.

Great Things are now ev'n ready to appear,
Within the Verge and Limits of this Year.

The States-Man's busy, in close Consultations,
By Policy in all or most of th' Nations.
Now great Designs they labour to effect,
No Night, no Day, no Season they neglect.
May Heavens their Projects blest whose Ends are just,
But Vengeance last them that betray their Trust,

July hath XXXI Days.

What bodes that Northern Cloud that darks the Skies?
Things deeply laid, close cover'd from our Eyes,
Unwearied Time exposes now to light,
Things hidden long in shrouds of Sable Night:
Ambitious pent up Thoughts break out in Flame,
Oh! what can such ungovern'd Passions tame.

And now behold Cold Autumn-Blasts bereaves
The shady Arbors of their Verdent Leaves;
Feris now oppos'd by *Chronus*, most unkind,
Whence Mortals here, unthought of sorrows find.
Some Poets call Autumnus Morbifera,
God grant it prove not too much so this Year.

Bright *Jove* and *Hermes* also disagree;
Surely deep Vengeance now comes showering down,

False News prevails (though some believe it not,)
There's a base Design, or else a Roguish Plot.

December hath XXXI Days.

Thus have I run through all the Months o'th Year,
Viewing the various Shapes that in't appear;
And shewn the Inclinations of the Stars,
What they portend, either to Peace or Wars,
I thus conclude, Let us God's Word obey,
(Love one another) be happy whilst we may.

No Night, but all Twilight.

Judicium Astrologicum, pro Anno, 1751.

THE Brumal Ingress, or Winter Quarter, begins, according to Astronomical Computation, on Monday the 10th Day of December, at 55 min. past 8 at Night 1750, which Time the Coelestial Wanderers are thus posited, $\odot$ in 8 Deg. $\uparrow$ in the 4th, Ψ in 26 Deg. of Υ in the 9th, δ in 15 Deg. of Υ on the Cusp of the 4th, $\odot$ in the 5th, lately seperated from a Δ of ζ , φ and φ near a δ in the latter end of $\uparrow$ in the 5th, the $\circ$ in 13 Deg. of ω in the 3d, seperating from a $*$ of ζ , applying next to a $*$ of φ and φ , ζ and $*$, φ , with 17 Deg. of δ Culminating, and 28 Deg. of Ω ascending. But according to the Opinion of *Ptolemy*, I should have the chiefest Regard to the Lunation nearest this Tropick, which happens on December the 17th, at 20 Min. past 6 in the Evening, at which Time 6 Deg. of Ω Ascends and 14 Deg. of Υ is on the *Medium Caeli*, and Ψ in it, the $\odot$, $\circ$, φ and φ in the 6th, ζ and δ in the 5th. And thus are the Planets placed in both Figures, and in a general Manner are much alike, for all the Planets are under the Earth except Ψ , who at the Ingress is in the 9th, but at the Lunation in the 10th. From which Positions I Judge or Conjecture, that the general Affairs of *Europe* is managed with great Policy and Privicy, and that there is eminent Councils and Debates about Matters and Things that relate to Kingdoms and Nations, and particularly concerning War or Peace, and how those Things will be managed when the Season will permit: Ψ Lord of the 5th and 9th, in the 10th lately in Δ to the $\odot$, who is Lord of the 1st and 2d. This seems to explain and shew the Reason of the great Consultations, Councils and Debates is about sending and receiving some Ambassadors to certain Kingdoms in *Europe*; for if you Observe, the *Sun* had no sooner departed from the Δ of Ψ , but φ salutes Ψ with a Δ also, and then goes directly to δ of the *Sun*, this plainly Intimates, that there will be great Councils of Eminent Men held to consult on the Grand Affairs of Nations.

P A R T R I D G E, 1751.

that is, both of Church and State. Of such a noble Position *Haly* tells a Story of Law and Wisdom, that they shall be more apparent and manifest at that Time more than others, and that the Professors of those Things shall be more in Esteem than usual; for *Jupiter* in the Sign *Aries* on the 10th, gives Honour and Favour to the Clergy, and Prosperity to Kings and Superiors; I could wish I had no worse to relate of this Quarter; But alas! about the Middle of *January* we have a Conjunction of the two Grand Infortunes η and δ in 11 Deg. of the Regal Sign *Sagittary*, in Opposition to *London's* Ascendent. *Haly* saith, the δ of η and δ is the most malignant of all Aspects; the Envious and Malicious being united with the Rash and Furious, are then prepared for Actions, the most flagrant and the most Terrible. The learned *Escuidas* says, *Conjunctio media Saturni, &c. Martis significat eventus, &c. res maximas; Bonatus* says, such a Position signifies many Evils and remarkable Transactions happen in those Years, they are in δ or δ , and this our present Configuration will really and solely sway the Actions and Affairs in *Europe* the Winter and Spring Quarter, and would take up more room to write my Opinion of its Effects than I am allowed for the whole Year: But to be short, I will proceed, 1. It signifies an Interruption in Publick Affairs, and Obstruction to the Advantageous Designs under Consideration for the Peace of Mankind, stirring up preceeding and new Ferments and Heats in the Councils and Courts of Princes, tending to Ruin and Confusion, hatch and contrive Plots against the Established Government in certain Kingdoms of *Europe*; and all these will be managed with great Privacy, because of their Subterranean Position.

2. The Health and Constitution, in general, of Mankind seems to be affected, by raising up preternatural Ferment in the Stomack, Saline Acidities in the Blood, disordering the *Archeus*, and contaminating the Microcosmical *Aether* with a Lethal and Morbifick Habit, threatening Death by putrid Fevers, Obstructions of the Spleen and Hypochondors, Astmatick Coughs and Disorders, Agues, Hecticks and Chronick Diseases in general, and this throughout the whole Season in some Parts and Cities, according as they

they are situate and governed by the presiding Malefick Stars. 3. They will affect the Air with strange and unusual Weather (the Season considered) by sudden Mutations, from one extream to another, sometimes Hot and then Cold with Coruscations, Lucid and Fiery Appearances, with other unusual Accidents and Phenomenas. Wind and intemperate Storms, Thunders both Aerial and Sub-terranean, which may cause divers Agitations of the Earth in some Places, that is, Passive to Cœlestial Configuration, and I here insert some as followeth (*viz*) *Spain, Dalmatia, Sclawonia, Hungaria, Moravia, Misnia, Arabia, Fælix, &c. Sardinia, Lombardie, the S. W. Part of England, part of Flanders, Brabant, Dukedom of Wirtenburg, Hircania, Armenia, Cyrene, Egypt the lower, and divers other Kingdoms, Provinces and Cities too numerous to be here specified, and with the Poet I shall conclude this Trophical Sign and Conjunction.*

*Phænon and Mavor's inamicable Beams,
Excite the Human Frame to dire extreams ;
Where e'er it Operates 'tis to Ferment,
Stir up the Factious and the Male content ;
Rebellions, Murthers, Plots, and Robberies,
Makes Plebians murmer great Men Tyrannize.*

Of the spring Quarter.

THE Vernal Quarter commences this Year, on March the 9th Day, at 10 Hours, 50 Minutes, *post Meredia*, apparent Time, when 10 Deg. of *Virgo* Culminate, and 21 Degrees of *Scorpio* Ascends $\frac{1}{2}$ in 14 Degrees, $\uparrow$ on the Cusp of the 2d, in Δ to *Venus*, in 16 Degrees of γ in the 5th, *Jupiter* in 7 Degrees, δ in the 6th, in $\ast$ to *Mercury* on the 4th, and in Δ to the *Moon* and *Mars* in the 2d, δ is 15 Degrees in ψ , in Π to ζ , the *Moon* is in 8 Degrees of ν , separating from the Δ of ψ , and applying to the σ of *Mars*, and Π of *Venus*; at the Lunation preceeding, the Planet Position and Aspects is much the same; from this vernal Position, I shall therefore collect my Judgment.

PARTRIDGE, 1751:

ment. Here is a Mixture of Influences at the Time of this Ingress, some portending Concord, Peace and Prosperity, others Discord, Sickneſs, War, and Adverſity, all the Planets are under the Earth, and none to ſay Angular but the *Sun*, and none eſſential Dignified but ζ who is in his Exaltation according to *Ptolemy*, and *Mars* is the firſt Planet the *Moon* applys to by ϕ , and is Lord of the Ascendent in both Figures, and has lately been conjoin'd with ψ in $\uparrow$, but now quitted that Poſition and paſt the Δ of ψ ; ſo I take *Mars* to be Gubernator of this Revolution, and if we conſult the famous *Cardanus* a good Aſtrological Author, he ſays, if ζ be well placed in the Figure and eſſentially Dignified, it argues, the Soldiers ſhall be very ſucceſſful and prosperous, and perform many notable Exploits, have good Succeſs, ſhall vanquiſh and ſubdue his Enemies, and be had in great Renown. But I fear ſomething of his Judgment in his ſegment, the 7th and 68 Aphoriſm will happen to us, which ſays, *Mars quoque factis in revolutione Anni ſignificat Aſtus incendia fulgura Grandine, Bella*, *Mars* ſtrong in a Revolution of the Year, ſhews great Houſe Burnings, Heat, Lightnings, Wars; but the Places moſt ſubject to theſe Effects are, *Macedonia, Thracia, Bulgaria, Saxonia*, and other Countries in the Eaſtern Parts of *Europe*, and I fear ſome Cities in *England* and *Flanders* will partake of ſome of his Influence in one kind or other, which God of his Mercy avert. *Ptolemy* ſays, *Mars* generally cauſeth Deſtruction among Men by Wars, inteſtine Diviſions, violation of the Laws, Rapine and Robberies, &c. alſo Feveriſh Diſtempers, Tertians and Eruptions of Blood, ſudden Death, and that chiefly of the Younger ſort, alſo impregnates the Air, Hot, violent Winds, Peſtilential and Conſumptive, Thunders and Lightning, and fiery Eruptions, &c. But we have the Benevolent Planet *Venus* in *Albions* Horoſcope in *Mundane*, Trine to the Ascendent, in ſquare to *Mars* and *Jupiter* in the 6th, in Trine to the *Medium Cæli* and to *Mars* alſo, theſe I hope may prove Salubrious, and alleviate ſome of the Evils threatned by the preceeding Conjunction of *Saturn* and *Mars*, and create a good Underſtanding between the Monarch of Great-
Britain,

PARTRIDGE, 1751.

Britain, his Councils, and Subjects, the Aspect of Venus to Mars, will greatly contribute to temper the drought of Mars and afford us plentiful falls of Rain and fruitful Showers for the Season, yet the Weather will be unsettled and various, perhaps flabby in March, April more Windy and Moist, May more Cool and Dry than the former Months.

*Thrice Happy he that can securely Stand,
Ruling with Justice in a peaceful Land;
And unconcerned is to Hope or Fear,
Enjoys himself and all with Pleasure bear:
He, he it is that lives completely Blest,
His Monarchy, his Crowns above the rest.
Let us Esteem those Men that do oppose,
Both Foreign Lions, and Domestick Foes.
Now is the Time to shew ourselves like Men,
And loving Loyal Subjects too, and then
May Laurel Wreaths and never-failing Bays,
Still crown our Heads in these our Halcyon Days.*

Of the Summer Quarter.

THIS Estival Quarter intimates at the Moment of Time the Sun enters the first Scruple of Cancer or the Earth Capricorn, which either Way taken, happens this Year on June the 10th, at 44 Minutes past 9 at Night, at which Time we have 28 Degrees of Scorpio on the Medium Cæli, and 24 Degrees of Capricorn on the Eastern Finitors, Mars in 11 Degrees of ♋ in the Ascendent, and in ☐ to ♎ Retrograde in the 10th, as also to the Place of their preceeding ♂, Jupiter in the last Degree of ♍ applying to an ♂ of ♋, ♎, the Moon is in 9 Degrees of ♊, seperating from an ♂ of ♎, and applys to the ☐ of ♂ and ♂ of ♍, ♋ in 22 Degrees of ♊, so that we may justly term it a very violent Ingress, and the nearest Lunation much the same. The Subterranean position of all the Planets except ♎, intimate that the Effects of these Violent Aspects will not be so conspicuous at present, but in all probability a few Months will show both their Rigour and Violence, the Moon seperating from the Opposition

PARTRIDGE, 1751.

of *Saturn*, and applies to the Square of *Mars* and Body of *Mercury*, denotes the most confused and perplexed Councils imaginable, lamentable Complaints in or near this Ingress; the approaching Malevolent Opposition of *Saturn* and *Jupiter* will have their direful Influence effected and afflicted upon Mankind in due Time, so will the preceeding Comets of 1742, 1743, and that of 1748; who seemed as a Messenger unto the former, and as if Divine Providence hereby intended to reinforce the Events of the two former Comets, and the great Conjunction of *Saturn* and *Jupiter* in 1742, denouncing no good unto Mankind, but threatening him still with more impending Afflictions and Calamities, of that nature and quality as we may hereafter Specify; however, it is not improbable, but the Grandees of Kingdoms and Nations, People and Countries, are now designing and preparing as well as acting in and for more Wars in *Europe*; *Saturn* in the 10th in Opposition to *Jupiter*, causes unhappy Devisions amongst the Prime and Sovereign Councils of Nations, and both Ecclesiastical and Civil, with much disagreeing amongst one another. *Mars* in a doubled bodied Sign, as here posited, and in Square to *Saturn*, the *Moon* and *Mercury* imports *Non amabunt se Homines, nec associabunter, nec habebit Amorem aut pietatem, unus cum alio*: Men will not love one another, or will they associate together in Councils; for *Mars* thus posited, is Evil and cruel in his Signification, he stirs up Anger, denotes the desolving of Friendships and Societies, Leagues, Covenants, Articles, Dissentions, &c. *Interfectionem in Septentrione*, many Slaughters in the North West Parts of the World, this may reach *Poland*, *Muscovia*, and Places adjacent, and some Countries near Home, *cum multo latrocinio*, much Piracy and Robberies, &c. *erunt no-cumenta Hominibus*; these shall much afflict Men, Thunder in great Measure, Coruscations very strange in the Air, all these is like to astonish Mankind, *Saturn* Angular in the M. C. and *Luna* in the Quaternian Angle, and both in Quadrature to *Mars* in the Horoscope, intimates Storms and Tempestuous Weather both at Land and Sea, many Shipwrecks and much loss at Sea by violent Gusts and contrary Wind, and upon the South and Eastern Coasts;

PARTRIDGE, 1751.

continuas Inundationes, &c. particularia diluvia; We may I doubt, fear about these Times, or in a few Months, violent Inundations, and particular Deluges of the Sea, devouring and consuming much Ground, and in some Places whole Towns and Villages. I now proceed to examine and explain something of the Effects of the approaching Opposition of *Saturn* and *Jupiter* on the 26th Day of *July*, celebrated in the 8th Degree of *Gemini* and *Sagittary* and reiterated again in the 12th Degree, on the 11th Day of *October* in this present Year, all our Authors agree, that this is an Aspect of great Importance and denote Divisions, Quarrels, Contentions and Wars, &c. *Haly* gives us this Definition of it, *Oppositio Saturni & Jovis significat quod erunt multæ rixæ & placita inter Homines et gentes, unus inamabitur contra Alterum, vel inter alios Homines, qui sunt Inferioris gradus quam Reges etiam significabit multas Nubes*; it signifies (says he) there shall be much Strife, Contentions and Difference between Men and Nations, one shall be animated against another, and this shall be among Men of Quality, beneath Kings, as Princes of *Germany*, or of a Republick, such who in a Manner have absolute Command in their little Countries or Territories, it must also be observed; *significat quod evenient ad Reges vel divites sive magnates qui sunt in divisione signi in quo fuerit Saturnus, contentiones bellorum ex ipsius Regionibus, quæ sunt in Divisione signi in quo fuerit Jupiter à regibus sive magnatibus seu divitibus earum regionum: viz.* it will come to pass unto those Kings, great Persons, and chief Men, who are subject unto, or are under the Division of that Sign *Saturn* is in, Occasions the Wars or Controversies, with the Governors, or Rulers, or Commanders, or Princes of those Nations subject to the Sign *Jupiter* is in. Now, *Saturn* is in the Regal fiery Sign *Sagittary*, who is allowed the Kingdoms *Spain*, *Dalmatia*, *Slavonia*, *Hungaria*, *Moravia*, *Misnia*, *Celtica*, *Arabia*, &c. *Jupiter* is in the Sign *Gemini* an Aerial Constellation, and hath Signification of *Sardinia*, *Lombardie*, *Flanders*, *Brabant*, *Wertemberg*, *Hircania*, *Armenia*, *Cyrene*, *Egypt*, &c. with divers other Kingdoms, Provinces and Cities too many here to be here enumerated, from these and several

several Parts we may expect to hear of great Calamities and stupendous Catastrophes, Wars and Rumours of Wars daily assault our Ears ; these strange and preposterous Mutations, may and ought to admonish all the *Europeans*, to beware at least of such Calamities threatned, almost impending over many of their Heads, and which may without Repentance and appeasing Divine Judgment attend them and us in a few Years, if not presently. *Origanus* saith, *in eo Anno nulla quies, cum Jupiter & Saturnus in Oppositione sunt, nunquam enim mentes Hominum quiescunt.* There will be no quiet in those Years, wherein *Saturn* and *Jupiter* are in Opposition, for the Minds of Man cannot rest. Seldom do these Oppositions happen without a Pestilence, or some Epidemical Distemper, as also heights and excesses in the State of the Air or Earth, as high Winds, Hurricanes at Sea, dark Air, lasting Rains, as well as violent Storms, pernicious Hail, Floods and Innundations their Concommitants ; Lightnings, Thunder, Meteors, Comets, Earthquakes, and Eruptions, &c. and on the contrary, great Heat and drougthy Summers, and long cold Frosty Winters, unwholsome Mists, Fogs, Smoaky Air, Blastings, Mildews, Cobwebs, Gossamere, Caterpillars, Locusts, &c. those who are Conversant in Chronology and History, may compare the Events that attended Epichemasin or Prochemasin of the Conjunctions and Oppositions of the Superior Planets, may receive ample Satisfaction to my Assertion, and they may, as in a Perspective Glass, see the most stupendous Mutations and Catastrophes in all Ages are Concomitant to such Cœlestial Configurations. I could insist on this Subject largely, from the earliest Account of Time, if my limited Room would permit ; but must defer the Prosecution of the Matter to another Opportunity, and close with some necessary Observations relating to these Times, where we have had remarkable Instances of this Nature, viz. the late and Bloody Wars in *Europe* was pre-signified by the ζ of ι and ν in Ω , and the Comet preceeding ; and for our Wicked and unnatural Rebellion, and the grievous Calamity or Contagious Distemper amongst the Horned Cattle ; we had a splendid Comet appeared in

PARTIDGE, 1751

✱ and ♀ our 12th and Ascendent, a sufficient Cœlestial Omen, which also broke out on a ☿ of ♀ and ♂ in ☿, what intemperate Seasons, great Frost, drougthy Summers, extraordinary Thunders and Lightning, and wonderful Phenomenas have reached our Ears, all agreeing to such Cœlestial Malefick Configurations as I before-nominated; also, whole Armies of Locust have infested divers Countries; also, numberless Accounts of Prodigies have we been surprized with; all undeniable Arguments and sufficient Testimonies to convince the greatest Antagonist of Stellar Influence, and though the Health of Mankind have been more favourable these late Years than some others was, under such Cœlestial Configurations. Oh! how ought we to be the more thankful to G O D for His Mercies, and shew it, by making a sincere Conversion from our Wicked Ways, and live as the L O R D requireth, that is, according to the Prophet Micah, *to do Justly, to love Mercy, and to Walk humbly with thy G O D*; then we might still hope to have such impending Judgments averted: But, *è diverticulo in viam*, I must not act the Part of a Divine, but of an Astrologer, and as such Calamitous Mutations appeared under the great Malign Configurations, so Peace, Happiness, and Prosperity, attended good and more benevolent Positions, for the Peace was concluded on the Trine of Saturn and Jupiter, and some other benign Configurations and annual Directions. Thus far have I exhibited a short View of the Agreement of Mundane Transactions (of these late Years) with Cœlestial Configurations; and lastly, I shall consider Astrologically the natural Causes and Significations of

EARTHQUAKES.

These stupendious Mutations are concomitant with Cœlestial Configurations and Phenomenas, such as Comets and Malefick Aspects of the Superiors, as History sufficiently testifies in all Ages; our late Instance at London, &c. was under the Opposition of Saturn and Mars, it was on this Aspect last Year; I invoked for the City of London to be preserved from Fire, Sicknes, and all other Calamity, but the Aspect under our present Consideration

P A R T R I D G E, 1751.

deration, viz. the δ of $\hbar$ and ψ , have been remarkable in all Ages for Cœlestial Presignifications of such Events: It was on this Aspect a famous Astrologer predicted that stupendous *Terræ-Motus* (or as Dreadful an Earthquake as all History can Parallel) that happened in *Sicily* on *Jan. 7, 1693*, which destroyed 27 Cities and Towns, and 140,000 People, for from the 19th to the 20th, were no less than 14 distinct Earthquakes; also, under this Position was that destructive one to the Inhabitants of the Island of *Jamaica*, *June 7, 1692*, likewise that felt at *London*, *September 8* in the same Year. Now let my Reader be not so much amazed to hear of of such dire Calamities, nor so Timorous as the Citizens of *London* was, at the Prediction of another Earthquake, by a Crazy Headed Soldier: But first, let every one forsake his corrupt abominable Wicked Ways, and turn unto the LORD and Obey his Voice, and then we shall be prepared better for what ever Changes may come, for, who can Escape the Hand of Divine Vengeance? For tho' the efficient, material and formal Causes of an Earthquake be Natural, yet the primary Cause is from GOD, and the final is the Signification of an Angry GOD, justly provoked by the Scarlet Crimes of a Wicked and Disobedient People, according to that of King *David*, *Commota est, &c. contremuit Terra fundamenta Montium conturbata sunt et commota sunt quoniam iratus est eis*, *Psal. 18, v. 7*, the Earth shook and trembled, the Foundations also of the Hills moved and were shaken, Because he was Wrath. Indeed, many Learned Men in all Ages, have generally and unanimously consented, that, *Terræ motus mali ominis habetur*, that an Earthquake is looked upon as an evil Presage, and the more the greater, and more violent it is in Motion an Action. *Cardan* in his Book *di rerum variit*, Chap. 72, tells us, *Terræ motus magni bellum aut pestem nunciant vel Tyrannecam Oppressionem*; great Earthquakes do presage a War, or Pestilence, or some Tyrannical Oppression. *Testanter et Historia omnium Temporum, &c.* the Histories of all Times and Ages do testify, that after an Earthquake there hath followed very eminent Mutations, as Slaughters of Men, Wars, Seditions, Inundations, Dearthness, Famine, Scarcity, Plagues,

PARTRIDGE, 1751.

Plagues, and other attendant Calamities. *Pliny* saith of *Rome*, *nūquam tremuisse, ut non aliquem futurum eventum præfagiret*: that it never had an Earthquake that did not foreshew some future Event. For *Finis Terræ motuum est denuntiatio iræ*, & *vindictæ divinæ*, the End of Earthquakes is (saith a Learned Author) the Manifestation of Wrath, and the Divine Vengeance or Punishment, for thus saith the Prophet *Jeremiah*, Chap. 10. v. 10. *at his Wrath the Earth shall Tremble, and the Nations shall not be able to abide His Indignation.*

O when Jehovah shakes his Angry Rod,
 What Heart can bear th' inexorable GOD;
 When Earth beneath our Feet tremendous roll,
 And deep Convulsions make the Ocean boil;
 They all contribute to repeat this lay,
 ' Awake, Repent, e'er we dissolve away;
 ' Repent, amend your Actions, Grace implore,
 ' Ere means, Occasions, Time shall be no more.

Of the Autumnal Quarter.

THIS Quarter begins *September* the 12th, at 10 min. before Noon, at which Time 16 Deg. of π is on the *Medium Cæli*, and 24 Deg. of π Ascends, the *Sun* in the 10th, β and γ in Opposition from the first and seventh, δ in the fourth, the *Moon* and *Venus* in Conjunction in the 12th, ζ in the 11th. I shall have no Reason to insist on a long Judgment upon this Figure and Quarter, the Positions is nearly allied, and will follow the Fate of the former Part of the Year, there being nothing material in this Figure but what has been remarked before, except the *Sun*, who has lately past the Opposition of *Mars*, which seems to import Animosities betwixt the Governors and Great Men of some Foreign Nations, for Honour, Dignity, and Superiority. It is *Spain*, *France*, and the King of *Sardinia* must relate the Story, it is their Troops and Territories will be most concerned; so, in a Word, the Spring Quarter will begin and hold with a Fuery; the Summer Quarter will

P A R T R I D G E, 1751.

will eminently shew the Effects of the former, and operate with remarkable Transactions, but the Effects will be durable, and not terminated these several Years to come, but this of Autumn affords no new Matter, either for Discourse or Action, and so I conclude.

*Then let each Man with's Lot contented rest,
If he with quiet would be fully Blest;
Give to the Glorious Starry Host their due,
Yet not forget their G O D and M A K E R too:
For Crimes against Him produce all terrene Jars,
And Peace with HEAVEN corrects our wayward Stars.*

Upon the Eclipses.

THIS Year affords four Eclipses, two of the *Sun* that is Invisible, and two of the *Moon* Visible if the Air prove clear, according to the following Calculations.

The First is of the *Sun*, and happens on *May* the 13th, at 12 hours 51 minutes, *post Meridian*, according to Astronomical Computation, but by the common Account, it is on the 14th Day, at 9 minutes before One in the Morning, so consequently Invisible to any of these Kingdoms.

The Second is of the *Moon*, according to the following Calculation from Dr. *Halley's* Tables,

*And now my Book farewell, thy Journey take,
Throughout Great-Britain, and thy Present make;
To all thy Friends, be kind and let them see,
What from the Stars, is here declar'd by thee.
If some condemn thee, pray such to forbear;
Without some Faults, where is their one this Year?
Since Adam's fall, we all Transgress alike;
And thou amongst the rest, poor Almanack!
Yet let not various Entertainment fright thee,
If Kindness some Express, yet others slight thee;
When the Saturnine Frown, fear not his Looks,
Nor Jupiter's blind Zeal that Damns such Books:
Nor Mars his Anger, but avoid his Steel,
Bow to Sol's Lustre, lest he make thee reel:
If Venus wantons, seek to Blast thy Name,
And Wits Mercurial, thy plane Stile defame;
Though Lunar Vulgars Zoile and Momus too,
Do say thou treat'st of what thou'st not to do;
Tell them thy Errands, not design'd for them,
Nor such as (what they Know not) do condemn:
Once more be gone, I say, now take thy Fate,
And serve thy Friends, 'till thou art out of Date;
To Protestants, and all true English Men,
My Service give, G o d Bless them all. Amen.*
